March 14, 2020

Dear CDC Families,

This morning, I met with staff and leaders of CUMC and our Child Development Center to discuss the COVID-19 closures. After much discussion and research of current information, the collective group decided to close the CDC for the upcoming week, Monday, March 16 through Friday, March 20, 2020. This includes all preschool and Before & After Care Programs.

During this time, CDC staff will be at the school will be conducting a deep-cleaning of the entire Center using rigorous cleaning procedures consistent with guidance from the Department of Health.

Additionally throughout the week, parents will receive communication from their child's teacher to include short lessons, activities, links to creative movement, and other short educational resources.

We are closely watching the COVID-19 situation as it develops and constantly looking to our local Office of Child Care for guidance as we move forward. We encourage our families to also monitor the rapidly changing situation on the local, state, and national level.

I will be communicating with you later this week about our procedures and decisions regarding the following weeks. In the meantime, for the latest status update please go to www.cumc.net/covid-19/. If you have any comments or concerns specifically about CDC operations, feel free to email me at director@communityunitedmethodistcdc.org and I will try to respond as soon as possible.

Please stay safe and take care of your family.

God bless,
Monica L. McGirt
Director
